Steam Turbine Steam Rate (kg/kWh)

Theoretical and actual steam rate of a steam turbine in kg/kWh, and the steam flow needed for a given electrical output (IAPWS-IF97).

Input parameters

Unit system: SI

Parameter	Value	Unit
Inlet steam pressure (absolute)	45.000	bar
Inlet steam condition	Superheated at the temperature below	
Inlet steam temperature (superheated only)	400.00	°C
Exhaust pressure (absolute)	400.00	kPa
Turbine isentropic efficiency	75.000	%
Gearbox and generator efficiency	95.000	%
Electrical output wanted	2,000.0	kW

Calculated results

Parameter	Value	Unit
Actual steam rate	9.2527	kg/kWh
Steam flow for the output	18,505	kg/h
Theoretical steam rate	6.5925	kg/kWh
Isentropic enthalpy drop	546.07	kJ/kg

Formula and method

$$TSR = \frac{1}{h_1 - h_{2s}} \qquad ASR = \frac{1}{(h_1 - h_{2s})\,\eta_i\,\eta_g} \qquad \dot{m}_s = ASR \cdot P_{el}$$

Variables

p_1	inlet pressure, absolute	Pa
state	dry saturated or superheated inlet	–
T_1	inlet temperature (superheated)	K
p_2	exhaust pressure, absolute	Pa
η_i	turbine isentropic efficiency	–
η_g	gearbox and generator efficiency	–
P_{el}	electrical output wanted	W
ASR	actual steam rate	kg/J
TSR	theoretical steam rate	kg/J
$\dot{m}_s$	steam flow for the output	kg/s
$h_1 - h_{2s}$	isentropic enthalpy drop	J/kg
$h_1 \;\; h_{2s}$	inlet and isentropic exhaust enthalpy	J/kg

Method and standards

Steam rate from the isentropic enthalpy drop (FireCAD IAPWS-IF97) and the turbine and generator efficiencies. Shown in kg/kWh; 1 kWh = 3.6 MJ.

Assumptions and limits

- Single expansion, constant efficiencies, steady flow.

Report details

Report reference	FCC-2HVC-QM94 (the same inputs always give the same reference)
Generated	23 November 2026, 17:43 UTC
Calculator	Steam Turbine Steam Rate (kg/kWh)
Method last reviewed	11 November 2026
Software release	FireCAD Calc, release of 22 November 2026
Release checks	3 reference cases of this calculator, computed independently, are checked on every release

Results are for engineering estimation. Verify critical designs against the referenced standards and your own data.
