Density and Specific Volume Converter (kg/m³, g/cm³, lb/ft³)

Convert a density between kg/m³, g/cm³, kg/L and lb/ft³, and give the specific volume in m³/kg, L/kg and ft³/lb.

Method: NIST SP 811 (2008); Appendix B conversion factors

Input parameters

Unit system: SI

Parameter	Value	Unit
Density (choose its unit)	950.00	kg/m³

Calculated results

Parameter	Value	Unit
Density in kg/m³	950.00	kg/m³
Density in g/cm³	0.95000	g/cm³
Density in kg/L	0.95000	kg/L
Density in lb/ft³	59.307	lb/ft³
Specific volume in m³/kg	0.001053	m³/kg
Specific volume in L/kg	1.0526	L/kg
Specific volume in ft³/lb	0.016862	ft³/lb

Notes for this case

- Specific volume is the inverse of density.

Formula and method

$$v = \frac{1}{\rho}, \quad 1\ \mathrm{lb/ft^3} = 16.018\,46\ \mathrm{kg/m^3}$$

Variables

ρ	Density (choose its unit)	kg/m³
v	Specific volume in m³/kg	m³/kg

Method and standards

Exact pound and foot definitions (NIST SP 811).

Assumptions and limits

- Units only.

References

- NIST SP 811 (2008)
- Appendix B conversion factors

Report details

Report reference	FCC-HYGZ-ME7D (the same inputs always give the same reference)
Generated	17 November 2026, 19:54 UTC
Calculator	Density and Specific Volume Converter (kg/m³, g/cm³, lb/ft³)
Method last reviewed	12 November 2026
Software release	FireCAD Calc, release of 17 November 2026
Release checks	3 reference cases of this calculator, computed independently, are checked on every release

Results are for engineering estimation. Verify critical designs against the referenced standards and your own data.
