Energy Equivalents Converter (toe, tce, boe, MMBtu, Gcal)

Convert an amount of energy between GJ, MWh, MMBtu, Gcal, tonnes of oil equivalent, tonnes of coal equivalent and barrels of oil equivalent.

Method: Unit definitions per NIST SP 811 and the SI Brochure (exact where defined); IEA and OECD energy statistics conventions (1 toe = 41.868 GJ, 1 tce = 29.3076 GJ); ...

Input parameters

Unit system: SI

Parameter	Value	Unit
Energy (choose its unit)	25.200	toe

Calculated results

Parameter	Value	Unit
In GJ	1,055.1	GJ
In MWh	293.07	MWh
In MMBtu	1,000.00	MMBtu
In Gcal	252.00	Gcal
In tonnes of oil equivalent	25.200	toe
In tonnes of coal equivalent	35.999	tce
In barrels of oil equivalent	172.41	boe

Notes for this case

• The oil and coal equivalents are conventions, not properties of a real fuel: 1 toe = 10 Gcal = 41.868 GJ (IEA and OECD), 1 tce = 7 Gcal = 29.3076 GJ, 1 boe = 5.8 MMBtu = 6.119 GJ. National statistics sometimes use other values (India's energy statistics and some company reports differ), so state the factor you use.

Formula and method

$$1\ \text{toe} = 41.868\ \text{GJ}, \quad 1\ \text{tce} = 29.3076\ \text{GJ}, \quad 1\ \text{boe} = 5.8\ \text{MMBtu} = 6.119\ \text{GJ}$$

Variables

E	Energy (choose its unit)	J

Method and standards

Energy equivalents.

Assumptions and limits

- Conventional equivalents; IT calorie and Btu.

References

Unit definitions per NIST SP 811 and the SI Brochure (exact where defined), IEA and OECD energy statistics conventions (1 toe = 41.868 GJ, 1 tce = 29.3076 GJ), Barrel of oil equivalent = 5.8 million Btu

Report details

Report reference	FCC-N4C1-AXWC (the same inputs always give the same reference)
Generated	23 November 2026, 18:01 UTC
Calculator	Energy Equivalents Converter (toe, tce, boe, MMBtu, Gcal)
Method last reviewed	17 November 2026
Software release	FireCAD Calc, release of 22 November 2026
Release checks	2 reference cases of this calculator, computed independently, are checked on every release

Results are for engineering estimation. Verify critical designs against the referenced standards and your own data.
